PHASE 1 - Encryption-Ready

Programming for the transition to encryption will change your radio controls.

Danger! Encrypted comms will not be heard until transition.

Also Important! Your radio must be reprogrammed to hear and transmit encrypted calls.

Scan On/Off

Tap - Display Light
Hold - Display Flip

2-Position Switch
Transmit Clear = O
Transmit Encrypted =⊘
Stay on Clear (O)

3-Position A/B/C Switch
Zone 1/Zone 2/Zone 3

PHASE 2 - Region Transitions, Encryption Enabled - planned Q1 '26

Dispatch or your command staff will notify you when to enable encryption.

Encryption-keyed radios will playback any authorized audio regardless of the toggle setting.
The 2-position switch must be toggled to transmit encrypted audio.
If encryption is not available, your radio will transmit in the clear regardless of the toggle setting.

2-Position Switch
Transmit Clear = O
Transmit Encrypted =⊘
Flip to Encrypted ⊘

PSERN^△
PSERN^04
Zone Prfl Rcnt

PSERN^△

^ Caret Symbol = Encrypted Talkgroup

PTT

**Clear = beepbeepbeep-BEEP
Encrypted = beepbeepbeep**

PHASE 3 - Radios are "Strapped"

Post-2nd programming, radios will be strapped to only encrypted or only clear communications, per-talkgroup, no toggling necessary.

Once reprogrammed, radio controls will change to the following:

Tap - Display Light
Hold - Display Flip

Conv: Monitor
Trunk - Site Search/Display

2-Position Switch
Scan On = O
Scan Off =⊘

3-Position A/B/C Switch
Zone 1/Zone 2/Zone 3
